## Streamlined Visitor Management: Enhancing Your On-Site Efficiency & Security

Visitor Access

Verified significantly enhances your visitor management requirements by eliminating the need for apps, kiosks, and hardware, ensuring a seamless, secure on-site experience. With advanced web-based technology, visitors experience a contactless sign-in process, while businesses benefit from real-time transparency about who is onsite, enhancing security and operational efficiency.

Key Features	Description
QR Code Sign-In	Visitors use their smart device to scan a QR Code for quick and convenient access.
Sign-in via Geolocation	Using the device's location, Verified will show the sites nearby for visitors to sign-in to.
Self-Registration	Visitors can register themselves by entering their name and phone number, followed by a two-factor PIN creation, eliminating staff involvement on site.
Quick departure	Hit the checkout button on device to record when the visitor is leaving site.
Configure role types	Customise role types based on your organisation requirements to accurately categorise and manage visitors.
BYO Device	No kiosk requirements, visitors sign in using their own smart device.
Sign in via Site Manager / reception	Sign in via the site manager or reception desktop feature.
Visitor Arrival Notifications	Instantly notify relevant onsite personnel their visitor has arrived.
Site Notice Board	Notify visitors of critical hazards or important site notifications as they arrive onsite. Configurable by site and shows for a specific time.
