Streamlining Site Inductions for Risk Management & Governance

Site Induction – Risk & Governance

Verified streamlines your induction process by digitising paper-based procedures into a single system and workflow. Tailored to roles, our site induction module provides attendees with current policies and procedures. Real time visibility into onsite personnel and activities empowers site managers with crucial information and management facilitated by complete access and oversight.

Key Features	Description
Customised Inductions	Tailor induction content to deliver role specific information and acknowledgements.
Self-Management	Sites have full access to manage and update site specific induction content.
Documentation and Policies	Provide access to current policies and procedures, from evacuation diagrams, hazardous material register, to speak up policies etc.
Instant Rollout	Rollout new acknowledgements, content or policies and/or changes without any lag time.
Access Control	Configure inductions to meet your operational needs, granting or denying access as necessary.
Notifications and Alerts	Immediately notify of access alerts to required personnel.
Photo Evidence	Capture and attach photos as required during the induction process.
Desktop Induction	Enable site managers or receptionists to induct visitors on computer as required.
Site Portal Access	Onsite personnel all have access to view real-time activity and manage critical site information.

Highlights

Instant Access

Provide site attendees with current policies and procedures
