Enhancing Site Pre-Qualification Checks

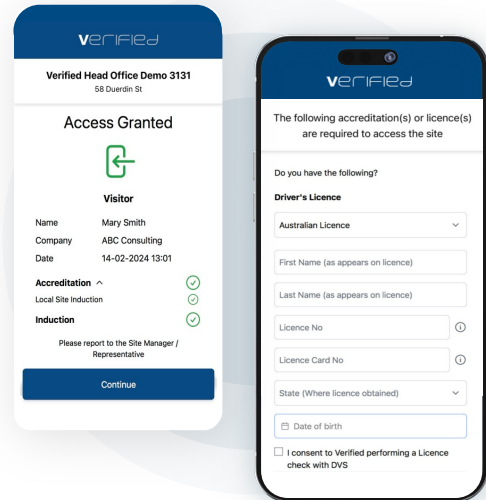

Worker Credentials

Automatically check at the time of attendance that your visitors and contractors meet all your pre-learning or qualification requirements. Ensure visitors comply with your requirements when arriving onsite whilst providing teams with real-time status checking for instant validation.

Key Features	Description
Custom Checks	Define specific qualification requirements based on roles (e.g. visitor, contractor, supplier etc.).
Real-Time Validation	Instantly validate your visitors' qualifications such as VEVO working rights, drivers license, completion of learning modules (LMS), etc.
Deny Access	Configure rules to prevent access for visitors or contractors who don't hold specific or current qualifications.
Company Requirements	Validate insurance coverage and work cover status to meet your company's standards for comprehensive compliance.
Individual Requirements	Verify individual-specific requirements such as trade licenses, working with children checks, vaccination requirements and/or police checks.
Confirmations at Sign In	Prompt users to provide accreditation or qualification details upon site entry, ensuring immediate compliance checks.
Expiry Notifications	Automatically alert users when their qualifications are nearing expiration and prompt uses to update.

Highlights

Real-time
Instant credential checks at site entry tailored to role requirements

Access Control
Automatically deny site entry to non-compliant visitors

Live Data
Real-time visibility and reporting of the complete audit trail
